BRYSTON B135³ CUBED

Bryston has replaced its well-regarded B100 with the more powerful B135³, which uses preamp elements from Bryston's preamplifiers as well as significant technology from its cubed power amps.

With ample analog inputs, an optional MM phono section, and an optional on-board DAC, it is a versatile unit with enough power (135W) to drive even somewhat tricky speakers.

High build-quality, versatility, and overall sonic immediacy and clarity are its strong points.
