

USB/MQA decoder firmware update manual

Equipment used

Windows computer (with built-in USB 2.0 port)
 USB cable

Supported operating systems

Windows 8 (32/64-bit)
 Windows 8.1 (32/64-bit)
 Windows 10 (32/64-bit)
 (as of April, 2020)

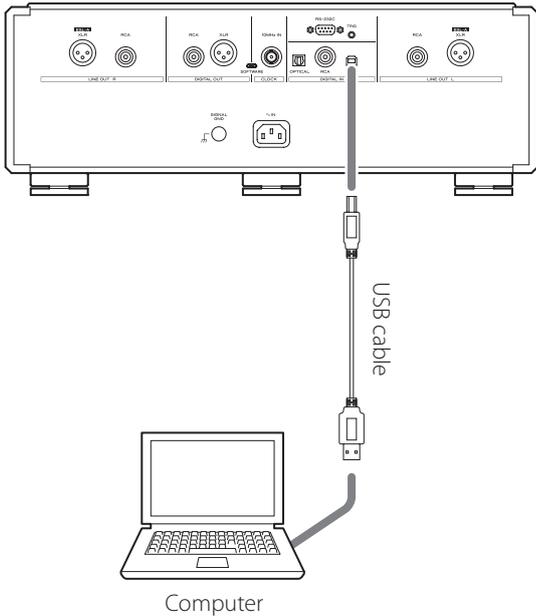

Preparation

A USB cable is necessary to update the firmware.
Use a commercially-available USB cable.

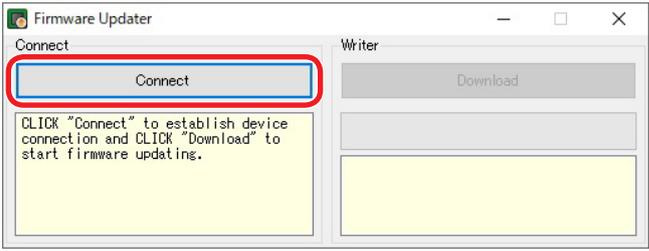

Update the USB/MQA decoder firmware

- 1 Turn the unit on.**
- 2 Set the input source to USB.**
 For instructions, see "Changing the input source" in the product owner's manual.
- 3 Connect the unit to the computer using a USB cable.**

Connection example (K-01XD shown in illustration)

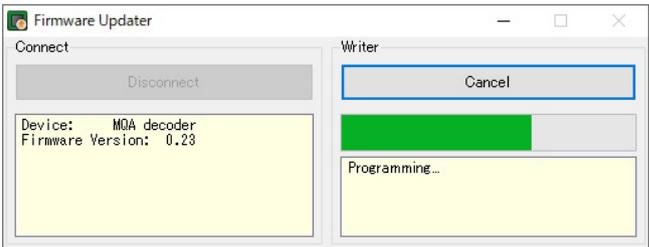

- 4 Double-click USBMQA_vxxxxxx_updater.exe.**
- 5 Click "Connect".**

- 6 Click the "Download" button to start the update.**

- 7 When "Succeeded" appears, press the POWER button on the unit to turn it off. Then, disconnect the USB cable from the unit's USB port.**

- 8 Turn the unit off.**
