Bryston Mini A Speakers—Customer Feedback

Well the Bryston Mini A's are home.

At first glance they don't look like much. I've been playing with them on my living room system which is a vintage Marantz 1550 and all I can say is

WOW!

For such a small footprint these are the nicest

sounding bookshelf speakers I've ever heard. The bass response is comparable to my larger floor standing loud speakers. The high's and mids blend seamlessly with the bass. That old saying bigger is better doesn't apply to the mini A's now they will go into my sound room and will be matched to my 3B pro. I can only imagine what these little guys will sound like then.

If your looking for a 3 way smaller speaker then look now further. I might add that my living room is roughly 20'x 20' I had to continually pull these speakers from the wall further as volumes went up. I'm now on the hunt for the bigger Bryston speakers.

Amazing craftsmanship as you look deeper in the construction.

I'm a happy guy.

Steven Pauli
